Helpful hints for an accurate quote

THE BASICS

1: CAGE LAYOUT

- > Floor plan, rough sketch etc.

2: WIRE MESH PATTERN & GAUGE

- > *Welded 2x2 sq. 10ga. (standard duty)
- > *Welded 2x2 sq 6ga. (heavy duty)
- > *Woven 1 1/2" diamond 10ga. (standard duty)
- > Other non-standard patterns available (ask your rep)
- *our standard mesh meets DEA & IBC Specs

3: HEIGHT OF CAGE

- > Standard heights are 6'-2" thru 12'-2" (in 1' increments)
- > Special heights are available (ask your rep)

4: DOOR TYPES

- > Hinge: 3' or 4' wide
- > Slide: 3' - 10' wide
- A: Height & Width of door opening*
- B: Type of lock required
- C: Direction to close (outside looking in)
- D: Accessories i.e. Panic Bars, Closers, Dutch Door
- *Insure you have room for the doors such as aisle space, overhead obstructions etc..

5: COLOR

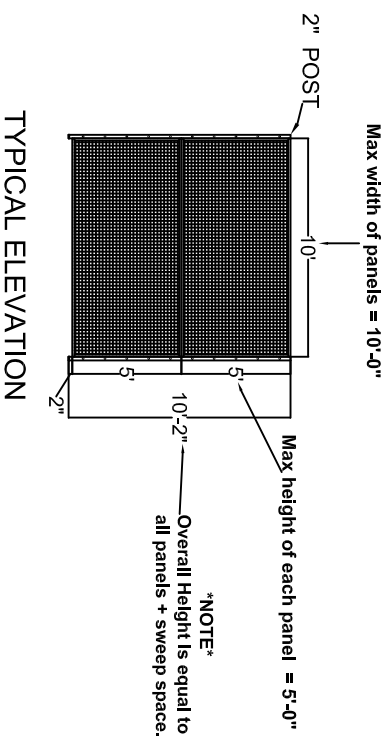

- > Beast Black & SpaceGuard Gray are standard
- > Blue, Green, Yellow, Orange, Red, & White are available for an additional upcharge.
- > Special colors available with RAL # (additional charges will apply)

POINTS TO DISCUSS WITH END USER

- Is a ceiling required?
- * Ceilings add to the overall height of a cage (up to 4")
- * For large cages there may be Joist support columns inside the cage to support the ceiling and beams (insure these won't interfere w/existing interior equipment)
- Will the cage go up to the existing roof deck?
- * Will the cage need to be tied off to the existing roof structure?
- * We recommend using web only panels to fill in between the cage and roof deck. Are Tamper resistant connections required?
- * This is common in DEA & high security enclosures. (our break-away nuts are an acceptable option to welding or peening the bolts/nuts)
- Is our standard sweep space of 2" acceptable?
- * There are ways to eliminate the sweep space (ask your rep)

ADDITIONAL ITEMS TO NOTE WHEN PLANNING YOUR CAGE

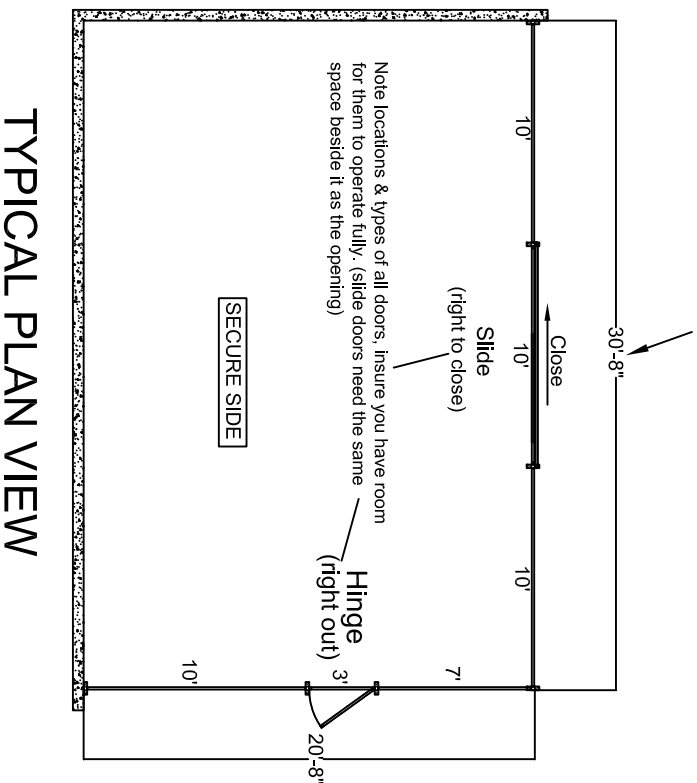

- Are there any obstructions that require cut outs in the cage system? i.e. electrical conduit, plumbing, HVAC, data cable trays etc..
- Is the floor level? (levelling spacers may be required & are the responsibility of the installer.
- Type of floor: Concrete, Wood, Tile (we supply standard concrete wedge anchors only)

TYPICAL ELEVATION

NOTES Overall dimension is equal to all panels and posts (3) 10' panels + (4) 2" posts = 30'-8"

*Make note of any critical dimensions, such as columns, existing bldg. doors or if a door needs to be a specific distance from an object.
